

# IEST APP

A professional app for iiest shibpur university

# Introduction

This is an android application.

It contains our professor, all students and all possible alumni profile of the IEST Shibpur.

Only they can join this application who have the iiests.ac.in mail id.

This application provides a online representation of our college activity.

This provides post features and comment features.

## Why it is important?

We don't have such source or social media where we can see who is our alumni, seniors, and our professors.

We need a social media app where we can see only our university member. So we can message him if we have important information to convey him.

Sometimes, we want to see what is happening inside the campus day to day life.

Sometimes I want to share something important message to all inside the university people so they can provide supports and make good decision.

## Other social medias are available?

Whatsapp - we don't have such group where every one of university member is available. Now whatsapp also contains channel.

Linkedin - It's focuses on companies, jobs and recruiters.

Other social medias have another aim to progress.

# Solution

IIEST Application is an android application.

It provides all the features that is needed now.

It provides a digital representation of campus activities and news.

It provides login password authorization.

It is a simple application.

# Fetures

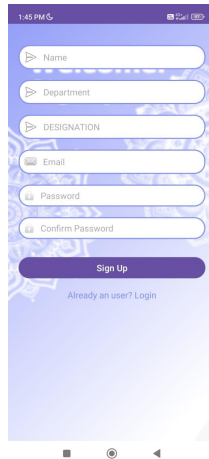

This app contains

Registration, Login, Logout section.

Post section , comment section.

Android Studio ,

# Funding

When we need funding for keep alive to this application.

We requested to our university members for this.

I hope they will provide support for a good work.

# Future

In future we add new features as per required.

Our university student will help to growth this application.

Thank you.
